I have already addressed it by asking where I will be living, and I was told I will not have any idea till August 17th. I am going to write out a schedule so I am able to finish my work in an appropriate time and manage my time. I have some health issues that limit me to participate in some activities. If I get proper rest and sleep, I find that I hope that by the time my classes start I will be comfortable enough with my surroundings to ask for help. I have never really been great at this, but I understand how crucial something as easy as asking questions can be. I will try to be more outgoing. I will discuss with an older sibling who attends UMN and other students about what works for them. I'll be in a course that addresses study skills and time management.

Academic advisors, tutors, friends

Academic coursework is my primary anxiety at this point because I believe that high school has not prepared me fully for a college workload. I plan to get to know my professors and ask for help whenever needed if my previous study skill patterns do not match up with the workload that college courses entail. I think the issue that bothers me is the issue of housing. I will be less worried about my housing situation after I have made some decisions.

Although I'm nervous about meeting new people, I'm also very anxious to meet new people. I've realized that everyone else is going to have the same concern as me. People are going to go out of their way to talk to others. I Although, this isn't the only big issue to me, from what's listed above this sounds to be the one thing that I'm most anxious about. I don't believe that just doing school work and getting good grades is the best thing to do. I believe maintaining the balance between studying, exercising, being social, and having fun is what is important.

Always having a map with me and making sure I know how to get to my classes a couple days before they start.

I am not especially worried about this, it is just something that I know I will have to figure out at some point. I think the best way to do this will be to simply adjust to life at the U for a while, and figure out a routine and schedule I am not guaranteed a housing assignment, so I do not know if I will have a room.

I am not really sure I am just worried that I will get a roommate that I don't get along with

I am not sure how

I am not sure. Putting my school work before entertainment and fun. But I know that is going to be difficult.

I am placed on the St. Paul campus and I am worried about commuting to class and other activities on the East and West bank. I have a friend from high school that got placed in a single and she said if it was needed I could I am planning on applying for on campus jobs.

I am planning on budgeting myself and exploring all scholarship and loan opportunities that I am able to. I also am I am planning on competing in a 2010 bodybuilding competition so I already have a 6-meal a day diet planned out I am planning on cooking much of my own meals in the residence hall kitchen and finding ways to be healthy on I am planning on finding a good job and spending conservatively.

I am planning on joining some clubs and organizations to meet new people and socializing with others in my dorm I am planning on taking advantage of study sessions, tutoring, and any other resources I need.

I am reading numerous books helping me learn to study better.

I am recovering from an eating disorder and will be enrolling in a program and continuing my therapy in I am taking a class on developing skills to college success.

I am taking a class that focuses on some of those areas and hope it will help me develop some of those skills.

I am taking a class this semester that focuses on handling the coursework and learning new and effective study habits. I think the class will help out a lot and make me feel more at ease with the coursework ahead of me.

I am taking a class to help me figure out what I would like to major in.

I am taking a college and career exploration class that will hopefully aid me in making a decision towards a major.

I am taking a college success class my first semester. I will also take advantage of the student resources on I am taking classes that will allow me to explore many different options in the health care field.

I am taking courses this semester which might give me an idea if I like one major or another better.

I am thinking about 3 ways to address my concern

First, I'll do preparation before classes. I'll read textbooks before classes begin

Also, I'll listen to the professor carefully on classes and take notes carefully. If I have any problem on my study, I can visit the professors or TA for help.

Finally, I'll join some discuss activities and discuss with my classmates. We can learn from each others and I can I am thinking about 3 ways to address my concern.

I'll do preparation before classes. I'll read the text books before the classes begin

Also, I'll listen classes carefully and take notes carefully. If I have any academic problem, I'll visit the professor and TA for help.

I am thinking about getting a tutor for Short Calc and hopefully getting into a study group.

I am trying as hard as I can to conserve money and find new ways to make money.

I am trying desperately to transfer halls so that I am off of St. Pauls Campus, so that everything will be easier as a I am trying to get a job but still it is still hard

I am unsure on how to address this issue.

I am using the U of M website's resources to ease my concerns about living in an apartment. I am speaking with I am usually a very shy person and won't talk to people unless they talk to me. But now that I am entering College I am very outgoing and plan on easily meeting at many people as I can!

I am worried most about time management but I will make sure to keep track of how I am managing my time I am worried that I will either not do my best in my schoolwork trying to have a social life as well or not having a social life at all trying to get all my course work done. I guess I don't really know what the reality will be until I see I am worried that my roommate and I won't get along. If this does happen we can hopefully talk it out and set ground rules to solve the problem. If worse comes to worse I could always request a roommate change.

I applied for a hall transfer.

I applied for Biochemistry, but I happened to be an undeclared major person. If I could know something clearer processes about how did it happen rather than I have to wait till my second year at UMN with high enough GPA, I I applied to a lot of on campus jobs in hopes of getting one while I am still in school.

I assigned to the residence hall that I do not want

So I did submit my hall transfer request but I am still concerned about it. I really really want my assinged hall to be I assume after welcome week and I start to meet people my anxieties will go away. Its just initially that I'm worried I believe I will just need to get use to the residence halls. Once I have adjusted to the living situation, like putting
I believe that friends and family can help one through whatever endeavors life throws at them. I know that the anxiety/concern is just another step in our life that our friends and family will help us climb onto. I believe that this concern could be managed with a schedule. I can address this by using a planner/calendar and studying in groups with other classmates.

I can make a schedule of homework time and classes combined that will help me budget all my time to the best of my capability. I can meet many people during the welcome week and make many friends at that time. I can remain in regular contact with family back at home. I can talk with the professors. And, ask for some solutions. I can try to be outgoing and confident when meeting new people. I concern that studying in United States' school has different kind of ways which I might not used to and it could be a considerable challenge for me considering I am an international student and we'll be trying to adapt with. I could address this in the seminar about major choices. I could address this situation by talking to people who have already taken classes in college and asking them. I could ask teachers how to study for their exams, tests, and quizzes on their open hours.

I could either talk with my counselor or do more research on majors and find out what I can do with them. I think my concerns will ease once I get started with some generals and I should be able to figure things out from there. I could find tutors to help me. I could get a tutor if I needed to. There are plenty of resources that will be provided that will assist me. I just need to increase my study habits. I could make a schedule and treat school like a job, meaning, get up at a good time and get everything done right.

I could make new friends and eventually adjust to a new way of living. I could save money and find a job on campus. I could talk to my counselor, or any students who are in my situations. I could try to stay busy and to make friends. I deal with this problem by being anorexic, or my body starts to shake from the stress and I stop talking or moving. I decided not to have a job first semester so I can focus on getting a routine that works for me.

I decided that I need to make my schoolwork be my first priority. I decided to take classes in my 1st semester that highlight my major areas of interest so I can hopefully narrow down my goals. I did sign up for a career exploration class for first semester so that should help me decide on a career path. Also I know that there is a career center on campus by my counselor's office where you can research different careers.

I do not agree with this process for Welcome Week because I take months to get to know people and I don't like being forced to interact with strangers in small group settings. It would be better for me to just come on Saturday and take a walk around campus to see where my classes are and then I would feel ready. Spending time with friends.

I don't have an anxiety about attending the U, however, I feel awkward as a twenty six year old attending these institutions. I don't have anything specific in mind at the moment, I guess I'm just going to go with the flow. I don't know what to expect. I just have to keep reminding myself that it's normal to not know what my major is going to be quite yet at this point.
I just have to stay calm like I did in high school. I have to remember my priorities.
I just have to work at it from the beginning. I have to get a feel for what my classes are like and manage my time well to be successful. I need to ask for help when needed. I also don't really know for sure what I want to do for a major. I just hope that making time with professors will help with me in class.
I just keep thinking about how much I will have to learn to study and develop new studying habits right away. I have met a lot of people already otherwise that would be a major concern of mine also. I took AP/CIS courses in high school and I just let things go on naturally... I just need to be outgoing and non-judgmental of others so I can build new relationships. I need to remember we just need to force myself to study and develop good habits that will help me do well in class. I just need to get off on the right foot with my schoolwork and make sure I keep up with it.
I just need to speak up more and talk to people, really. It's something I used to suck at, but have been getting a lot better at.
I just need to study hard and get my act together.
I just need to wait and dive right in when classes start at the university.
I just plan on being open to anything and meeting everyone. I'm hoping that I will get along well with my classmates.
I just plan on being open to anything and meeting everyone. I'm hoping that I will get along well with my classmates.
I just plan on being open to anything and meeting everyone. I'm hoping that I will get along well with my classmates.
I just plan to be outgoing.
I just plan to be really upbeat and open and get out and do a lot of things until I settle into a core group that makes me feel like I am part of something.
I just need to work hard however I am just unsure and anxious to feel the academic level at the U.
I know I will make friends by being a student-athlete and in my dorm, but I am still a little nervous about it.
I know I will need to put myself out there and be myself. I know I will need to be social and fun and not worry too much about not making friends.
I know it won't be a problem for me to meet new people, I am just nervous. I will just be myself and be outgoing.
I know that I simply need to get along with my roommate. If we differ in opinions or habits, I know that I will have to look past it and accept the person. Otherwise, the living situation would not be fun at all.

I know that once I get settled into school and on a schedule/path, I will have a better idea of what I would like to know the direction I would like to go, however, I don't have a clear career path of what I would like to do. I'm planning on using resources found at the U to look at what I could do with possible majors so that I can decide on an I looked at job postings and that sort of thing. I can just... keep doing that.

I looked at many major. I've tried to focus them all on one subject I would like.

I may apply for a reduced credit load.

I may decide to rush in order to meet girls with similar interests as me.

I may miss the opportunity to have the application of financial aid.

I may need to talk with my adviser and do some research.

I may try to get involved on campus to try to meet people.

I may try to seek advice from students and friends with richer experience. And I may also discuss with my I met my room mate over facebook, so we talk sometimes that way.

I might be living in Bailey Hall in St. Paul. So I'm just gonna have to get used to commuting and finding different I might get involved in some student groups, particularly those that focus on an academic subject, since that I might have to quit my job so I can focus on my course work. Also, I need to stay close with classmates to help I might have to start trying new skills frequently to keep me organized and on track.

I might have to work a lot on/off campus for paying the tuition.

I might see a counselor just to vent if I get too stressed. Or I'll talk to my mom or brother about it. I've also considered creating a schedule for myself during the week so I have time for social activities but also ample time I must be focused and goal-oriented throughout my time in college. I must devote time to studying.

I need a lot of exercise and personal time at first to cope with anxiety.

I need to achieve financial independence.

I need to adapt myself to the new university as soon as possible, and complete my ESL course smoothly.

I need to decide whether I should take the second major or not, and which major should be the second one I need to develop good time management skills & use the resources (such as tutoring) available to me.

I need to develop better study habits to ensure that I do well in my classes. And I need to set aside enough time I need to either get a license or by a U-pass.

I need to figure out what job opportunities there are in my desired major. I picked something that I know I love to I need to find what I want to do.

I need to get into a routine and I need to form a good relationship with my roommate. I would like to explore the campus in order to find the closest and most efficient place to study. In order to manage stress, I need to make I need to go into the situation with an open mind.

I need to know if I got a dorm, I've been waitlisted.

I need to learn how to balance things and manage my time better, so that I can devote the right amount of time I need to learn how to effectively manage my time.

Drew

I need to make sure that I'm really outgoing and open to everyone.

I need to manage my time wisely and my main concern is getting easily side tracked I need to pay for my next 3 years of college.

I need to plan out my schedule so my time is managed better. I need to exercise so I don't become depressed or unhealthy, and I need to make a large enough effort with others so I can confide in people for help.

I need to really organize my time and make sure to participate in study groups and if I need help make sure I get I need to use all of the resources on campus that will help me to succeed. I need to address my anxieties and I need to work much harder on my studies. Studying in groups and as an individual will help me.

I plan on addressing this concern by using the resources available at the U to obtain a job.

I plan on applying for a work-study job on campus while I'm in school.

I plan on approaching my professors and teaching assistants during any time of academic difficulty. I also hope I will adjust quickly to managing my time on a college campus, which will be radically different than how I've I plan on asking around and talking to my counselor about all the majors possible.

I plan on attending more social events and putting myself out there.

I plan on attending office hours as soon as I don't understand something.

I plan on attending Welcome Week events that will inform me on how to do well academically in college.

I plan on being active with welcome week and plan on joining some club sports.
I plan on creating a time management system that will help me stay focused. Also, I will do everything I can to develop awesome homework habits right away and being really disciplined from the start. I plan on developing relationships with various staff members who hopefully will be able to guide me to an added advantage. I plan on doing my best to stay organized and as ahead in my coursework as possible. Most importantly, no matter how hard the work may become, I want to keep my love for learning intact, and I can do that by finding at least some joy in the process. I plan on exploring the recreation center and sporting opportunities because I want to stay fit and busy in school. I plan on getting a job and my parents will help me as much as they can, but I just feel like it won't be enough. I plan on getting help from the university disability service. I plan on getting involved in lots of activities where I can meet new people. I plan on having a job, and budgeting my money as wisely as I can. I plan on joining groups and intramural sports and rushing for a sorority. I plan on joining study groups and making sure that I spend a lot of time studying. I plan on keeping my door open and being open minded about the people I meet. I plan on making a schedule and goals for myself in order to succeed in all of my classes. I plan on making sure my time is well organized and seek help when I need it. I plan on managing my time so I have plenty of time to study and keep of with all of my classes. I plan on meeting with a physician to address my health needs before they become serious within the first few years of college. I plan on participating in class and studying the beyond the recommended amount. I plan on participating in groups and events next year that can give me opportunities for scholarships. As for this year, I plan on putting myself out there more than what I did during my High School years. I plan on researching different majors and career options so that I become more aware of what is available for me and what I am interested in. I will schedule to get together with my counselor for some advice as well. I plan on tackling the problem before it occurs by planning out my weeks in advance. I plan on taking a variety of classes and explore my options while fulfilling my requirements. I plan on taking a variety of classes to explore my options and see what interests me while still fulfilling my major requirements. I plan on taking classes that I am interested in, and hoping I develop a strong interest in something. I also plan on talking to upperclassmen in order to see what worked for them and to get a better picture of what life is really like in college. I plan on putting myself out there more. I plan on trying new things so I can meet new people. I plan on trying to make my dorm room as useful as possible and discuss the rules of studying with my roommates. I plan on using all of the resources that the U of M provides to help me figure out what I am interested in, and what I can major in. I plan on using the campus resources to find a job related to my major. If that isn't possible, I worked as a bartender for over a year, so I could try to find a job bartending or barbacking somewhere near campus. I plan on utilizing all of the resources (tutors, etc.) that are offered to me. I plan on waiting a bit until I make a final decision. I want to take some different courses before I make a decision. I plan on working on being social and getting out of my bubble. I plan to address this concern by being as open and friendly as I can during Welcome Week events and in my first Introduction class. I plan to address this concern by being especially outgoing and friendly to everyone during welcome week. I plan to address this concern by being proactive in obtaining help and not procrastinating. I plan to address this concern through study groups, staying organized and talking to professors during their office hours. I plan to attend all classes and take good notes. I don't plan to register for too many classes and I will try to attend the event during welcome week designed to help students find a major. Other than that, I hope it plan to balance work and having fun to make sure I don't stress out too much. I plan to be less of an introvert and just talk to people. I plan to be myself and keep an open mind. I have been able to make friends all my life, even outside of school, but this step seems bigger than before. Deep down I know it will be fine, but it is still a little intimidating. I plan to be open to every chance at friendship and give everyone a chance. I plan to be outgoing while also participating in a lot of fun activities where other outgoing and fun people will be. I plan to better my study habits through trial and error in order to find out the best way for me to study effectively. I plan to designate specific times in which I can study or do other school-related things. I plan to develop my study habits early. I plan to do my best and work hard in my studies. I plan to exercise often by enrolling in a spinning class. This will also connect me with more people on campus. I plan to explore many different classes and career paths to figure out my likes and dislikes. I plan to find out about various student organizations, and possibly join a few of them. I plan to get out and meet people and make sure I am out and about and not staying in the dorms too much. It will plan to have lots of good communication with my teachers and T.A.s and I plan to take lots of notes to study off
I plan to hit the ground running.
I plan to join a sorority and I'm sure I will meet many people in my residence hall.
I plan to join many new clubs and activities to meet new people.
I plan to join study groups and set aside specific time during each day to study.
I plan to join study groups as well as manage my days filled with class, work and homework in a timely manner.
I plan to just focus on my school work right away, without loading myself with a job or lot of activities at first. If I discover that I am managing all my work well and have extra time, then I will add a job and activities as I go.
I plan to keep a diligent schedule and remember school is my number one priority. Also, i plan to take advantage
I plan to keep in close contact with my friends and family.
I plan to keep in good touch with my advisor and professors and also use my time wisely.
I plan to keep in touch with old friends through facebook and call them.
I plan to keep on top of my coursework.
I plan to learn skills such as managing my time well to succeed in class.
I plan to look into some of the on campus jobs provided by the university and if there are none of those available
I plan to make a set time when I will study for each class, in a set area and stick to this plan.
I plan to make a study schedule and follow it rigorously. I also plan to use my time wisely while outside of the

I plan to meet with my ATS advisor regularly and set up appointments, as well as visit the career center early on in
I plan to not work the first semester so I can devote more time to studying outside of class. I have my own laptop
so I can have a place to do all of my work and I also plan to communicate with my professors after classes.
I plan to obtain employment through the university as well as hopefully finding a second job. I will also be taking
I plan to participate in welcome week activities and keep an open mind and be friendly!
I plan to set aside special time on a daily, weekly, and monthly basis to spend time on my coursework and
I plan to set aside time for studying each day
I plan to spend a lot more of my time studying than I had in high school.
I plan to spend every waking hour outside of class in the library studying.
I plan to stay caught up in my classes and keep on top of my assignments. I also plan to ask for help if I ever
I plan to stay on task and complete all assignments on time, and I'll ask for help when I need it.
I plan to study hard and devote a lot more time to school work than I did in High school
I plan to take a major and carrer exploration course this year.
I plan to talk to my adviser about it and ask for some suggestions. In addition, I have read some books about the
majors I am interested in. I will take some basic science courses and decide which major is the best choice for
I plan to talk to other people to get advice and try as many new things as possible to figure out what I like and
I plan to talk with different types of people.
I plan to talk with my advisor and other helpful people in meeting my acaemic goals for college.
I plan to try and take small steps in each direction I'm interested, and maybe one of these topics will light a spark
which I can pursue further. I was trying to find tests or assesments of some kind to help me narrow down my
I plan to try to become really involved in everything I can in order to meet a ton of different people. The U has so
many clubs and other activities to choose from and be apart of, so getting involved early should help me to make
I plan to use the resources of the financial aid office and getting their help planning financing.
I plan to watch the balance between studying and spending time with new friends, putting the emphasis on
I plan to work as hard as I can!
I plan to work hard and try my hardest and not to get down because I get a bad grade!
I plan to work hard in my classes, talk to professors if necessary, and take advantage of University resources.

I plan to work hard, but look at things so that they don't seem SO overwhelming. I just don't want to screw up but I
I plan to work hard.
I planned my schedule to give me a break in the day so I can go to the gym on campus.
I pretty much have no money, so I have no idea what I'm going to do.
I procrasinate
I put in a transfer request so hopefully I won't be in Bailey Hall and have to take the bus every morning. I realised that I always have problems doing well in class. I am afraid if I can't doing well in class and that will effect my studies. I must change myself to make sure that in my academic coursework, I will do the best. I realize I must make a real effort to meet new people. I realize that all freshmen are in the same boat and many people know no one attending the U and we're all out to realize that I just need to find a balance in life and will stride towards that once I get there. I really haven't. I have no idea how to deal with this. I really have no idea, because I don't know if I will be having a job during school. I do have my parents as a back I really haven't thought of anything, just trying my best and making and effort will have to do. I really just have to be disciplined enough to study and make sure I make time for school but also make time to relax and have some fun at college. If I stay focused and set my sights on a few short and long term goals, I will I really just have to focus!! I really want to try job shadow a few different careers to see if I like them, and to try take classes in those fields I selected a few different events for Welcome Week that address this concern. I should address this anxiety/concern by convincing myself that meeting new friends works best when there is no anxiety at all, during which the new people can meet and connect with my best self. I should be open to all opportunities to meet people in the beginning. I should study more than i believe i need to. always stay on task and get to know the professors. I signed up for a class that will help me address these concerns. I signed up for CLA FIG. The smaller class is a way to meet other people that I can study with in writing and psychology. I also signed up for sessions that give study tips and tell how to balance your time. I signed up for sessions that give study tips and programs to use to help with homework. I plan to balance my time I signed up for the meeting about time-management at welcome week. I simply wish that I knew what I want to study at this point in time. I still do not know which major is going to fit my personality the most. it really bothers me the fact that i do not I still don't know how to deal about this concern. But the only thing I can do is resting and doing my best all times. I still haven't heard what type of dorm I will be placed in. Once I find that out, I will address my concerns because I stop thinking about the ways things can go wrong, and just go for it. It makes sense in my head, but not so much I tell myself that I have been able to handle anything my previous schooling has shoved at me, so how will this be I think being in Marching Band will help me make friends. I think continuing to apply for financial aid and finding a job that fits my school schedule and work load would be I think I may start applying for jobs asap. I think I will be able to speak with older students at the U to see what types of jobs they had freshman year, and I think I will just go out and be social. I think I will just need to live the experience of college life and be myself. I think I would have to start trying different strategies to find out which one would work out best. I think if I talk with my advisers I will be able to find the best path to address my concerns and put me at ease. I think I'll be fine once I get into things. I feel like it will be difficult going from living with at least 7 people in my I think I'll just have to study my first semester until I get a feel about how hard it's going to be. I think I'm just going to try to be myself, be outgoing, and get involved in different activities at the University. I think it will work itself out on its own, once I move into the residence hall and meet my roommate and other I think it's a wait and see thing. I'll just need to experience the kind of workload at the U and adapt. I think it's just something I'll have to figure out on my own, like what works best for me. I'll be sure to get the office I think keeping in touch with my parents about our current financial situation, staying thrifty, and working over the I think most of my concerns around making friends and meeting people will be relieved when i find out my I think setting a specific time when i study will help. I think taking classes that would experience different career paths, keeping an open mind, and exploring different I think that becoming involved on campus will help me to meet people and make new friends. I think that I will attend a lot of group setting type scenarios to meet new people, and hopefully I get along with my I think that I will be able to get along with my roommate, I am still worried though. I think that language is a problem for international student to do well in class. So I should be more active in I think that language is a problem for international students to do well in class. So I should be more active in I think that maybe talking to either a financial aid counselor or to a freshmens counselor will help with some of my concerns. I feel like I have a lot of questions that need answering and talking to somebody who knows what I think that once school starts and I will get in the groove of things, it will go away. I think that talking with my counselor and other peers will help guide me towards a major that I will be successful
I think that the best way to address this concern is to take my time deciding on a major and by making sure that I do plenty of exploring and research. I know that there is always guidance available if I need it.

I think that this is one of the most important parts of college.

I think the most efficient way is to communicate with professors after class, though they are often busy. If I can not find professors I will ask my classmates for help. I want to improve my English writing and listening so that I can think the most important is to develop my English. Maybe I can make local friends and attend some organizations to improve my English. And, adapting myself to the new environment and the college life is also an important part of college.

I think this welcome week program will really help.

I think Welcome Week will help me get excited for the school year and hopefully I'll be able to talk to some older mentor or counselor about my interests and possibly decide on a major that will lead me to a career after college.

I think Welcome Week will help relieve most of these anxieties and concerns.

I thought about being more outgoing even if I feel apprehensive.

I thought about making new friends and starting new relationships.

I thought about the U jobs, but I missed the date on that and so now I'll have to look into the GoldPass Program.

I thought I could try not to stress too much by adding some fun activities to my schedule-like intramurals and clubs-but not too many to overload myself even more. I also was thinking of becoming part of a study group to have thought I might as well be myself. Hopefully that way people will like me. I will probably be a little more outgoing I thought I would just see how it goes and try to keep up, trial and error I suppose.

I thought I would study much harder than I used to be, so I would be able to overcome the challenge. I thought maybe that I just try to meet as many people as possible. Also I should just be myself.

I thought that I could start plan my daily ahead of time.

Try to focus on my academic courses, and at the meantime, I should give myself some time to relax.

I might have trouble with English, I should improve my English by talking to friends and teachers, and write stuffs I thought that I would try to take as many courses as possible that are situated within my interests and then make I thought that it will be helpful to keep my family and friends updated on how I am doing at college.

I took a class to assess myself and find out what I am interested in.

I tried to have many different experiences.

I tried to put some more effort to get higher grades in classes.

I tried to put together a schedule that left time for studying though did not necessarily require me to study non-

I tried to see how my brother did address his academic coursework problem and hopefully do the same.

I try not to worry about it because I know that there are so many people on campus and it should be easy finding

I want to be extremely outgoing my first few weeks and I want to get to know all the people that are living around me. I hope to make a few friends that are in my classes to to alleviate any academic concerns that I may want to find a solid place that I can study my best in, and I want to set aside specific time each week that I will want to focus on finishing my general first and see what intrigues me the most. Also, I want to meet with a mentor or counselor about my interests and possibly decide on a major that will lead me to a career after college.

I want to get a job on or close to campus as soon as possible. I need to work, but school has to be my first I want to get some information about the study style of university of US

I want to graduate in 3 years. I hope to use the 24 credits I garnered through Advanced Placement passes to good effect. I plan to discuss the possibility of graduating in 3 years with my academic adviser and consequently I want to join clubs and intramurals to maybe ease the transition.

I want to make sure I always fill out my planner so my schedule is organized. I need to plan times to study and I want to make sure I study and focus on my coursework on my own time, ensuring that I know the material I want to meet many new people and make new friends, coming from a small town I wish to branch out.

I want to study well in University of Minnesota

I want to take a lot of different kinds of classes so I can find out what I enjoy and what I'm good at.

I want to talk to my adviser and ask for some suggestions. In addition, I have read some books about the majors which I am interested in. I may select some basic science courses and find out which major is the best choice for I want to talk to my advisor a lot. I want to explore every option possible to make sure i'm making the right I want to try to be as involved as possible and meet as many new people as possible.

I want to try to get a job on or close to campus that I can work weekday nights to try and help me pay off some debt. I want to try to go home as much as I can to see my friends and the people I care about, but am concerned that it will not work. I'm afraid they will forget about me and think I don't care about them.

I want to try to stay connected with the friends/relationship that I already have and expand my circle of friends.

I want to use college as a time when I get into the best shape of my life; which is anti-intuitive to the normal

I was accepted into the Job Guarantee Program for Freshman at the U of M.

I was hoping that I would be able to do a work study and find another job. To find this job, I think I will just have to
I was hoping there would be some sort of non-academic advising on this issue. I was just hoping things would work out, since most if not all classes will be open when I can register and I will be more familiarized with University administration, making it significantly easier to get the classes and such that I was planning to address this problem with financial advisers. I was thinking about getting an on-campus job to help me have more money. I will try to organize my time appropriately, and to always seek help if I need it. I will apply for as many jobs as I can find that interest me and simply hope for the best. I will ask my friends. They know better than me.

I will attempt to talk to my family on a regular basis and I will also try to visit them once or twice a month. I will attend welcome week and participate in the many activities which will help me make friends and meet new people. I will be doing a lot of research online and talking to my professors about opportunities. I will be eating a very strictly-balanced diet and exercising at least 4 times per week. Hopefully, I will sleep at least 8 hours per night. I will be exploring majors and opportunities within the Department of Communications and I will be utilizing the resources available to me at the University. I will be living at home so I don't know how I am going to be able to live half an hour away and yet still have the college experience (making friends, obtaining those relationships, etc.). At this point I am not sure how to address this problem with financial advisers. I will be myself, but at the same time try to be more outgoing. My main priority at welcome week will be to make friends. I will be open to new things and new people.

I will be outgoing and actively try to meet new people and make friends. I will be planning specific study times and hopefully study groups as well as obtaining various books related to the courses I am taking in order to increase my understanding and knowledge of the subjects. I will be proactive in searching for a job and will utilize the assistance the University provides. I will be very outgoing.

I will be working hard to maybe obtain some kind of scholarship, also, I will find out as much as I can on loans and financial aid. I will behave as an outgoing guy to make new friends. I strongly desire to share my happiness with others. I will call my parents regularly so that they don't worry and keep in contact with good friends. I will choose the right classes for me. I will of course attend all classes and compete homework on time. I will communicate with adviser, professor and elder student. I will contact some people that own businesses that I know in the area and see if they are hiring. I will continue to check online at the career/job center website and ask questions about employment opportunities. I will continue to see my therapist in Mankato, my home town, and I will also have a support system through my family and friends. I will continue to use the effective study and homework skills that I learned throughout high school, especially those that were most useful (and necessary) during my senior year. In addition, I will apply the study and work tips I will create a plan to balance all activities including my studies. I will dedicate certain times of the day and a certain location to help get all coursework completed on time. I will definitely have to step up the intensity with which I study. I will definitely take up writing letters to everyone.

I will develop a group of friends that I am comfortable studying with and I will be proactive in class. Also, I will try my best in my courses and try hard to find what kind of major fits me the most. I will do my best to achieve and make sure to do well in class. I will do my best to stay ahead of the curve and study on a schedule. I want to be able to have my lazy days and I will express it to my family and friends. I will find quiet environments to study in such as the library and I will create personal goals which will help me focus on my school work and do well in my classes. By using good time management and study skills, I will for sure keep in contact with my best friend who will still be at home only 25 minutes away. I also have to work on Sundays at my job back home so I will be home at least three weekends out of the month. It might be I will get my work done early, so I don't procrastinate. I will go to as many events and outings as I can. I will go to the employment center and look for a job there. I will have to balance how much I study, and how much I work and relax. In order to do well in class, I obviously will have to continue to be determined to do well and strive stay on top of my work, which I have done very well in high school. I also know that I will have to balance my social life with my physical and social life. I will need to have to manage my time well and study more. I will have to put my social life after my school work. I will have to schedule my time very effectively and find a routine time to study so that I don't get distracted and I will have to stay focused and make sure that procrastination does not overcome my schedule. I will have to study more and do the best that I can. I will have to take the bus just about everywhere.
I will have to take time everyday to do school work, but still have as little stress as possible! I will have to work hard to maintain a proper schedule. If I can buckle down (as I have in the past) I will be able to I will have to work more than I ever did in my life. Studying in groups and individually would truly help me out. I will have to work really hard. I will just have to be more outgoing and get a bit out of my comfort zone for initial meetings. I will just have to be open and try to get to know as many people as I can. I will just have to plan ahead and stay on task. I will just try to work as hard and as smart as I can, and also ask for all the help I need, and try to not bite off more than I can chew. Also, during Welcome Week, I will attend some classes/presentations about stress and time I will learn from students and teachers to find ways that will suit me for studying. I will leave my door open in more dorm welcoming all to come and visit to get to know each other. I will live a healthy lifestyle while at the U through simple discipline and dedication. I will look for help to make sure I can do the best in my classes that I can do. I will look more deeply into the various majors from which I will choose by speaking to upperclassmen and I will make a budget and take out a student loan. I will make an active effort to be an open person and try to be friendly to everyone. I also am going to become I will make sure I stay on top of my work and I won't fall behind. I will make sure to stay on top of assignments and put studying as a top priority. I will make the time to study and get the help I need if I do not understand the material. I will make time to hit the gym. I will most likely be calling my parents every night and telling them about my day. I believe it will alleviate some of I will most likely have a chance to take advantage of a lot of different resources. This should help in making me I will need to first discover how tough my classes and classwork will be and then I will just need to buckle down I will need to have tutors and good relationships with my teachers, balance will be important between the social I will need to make time to study and keep organized with my assignments and make sure they all get done I will need to set aside specific time for studying outside of class to be successful. I will need to study alot. I will set aside time when I do not have class to study and catch up on work. Also, I am taking an academic skills course, which I am hoping will teach me some fundamentals in surviving the college workload. I will study out of every day and make study groups. I will set up studying schedule for myself and stick to it. I will stay focused and prioritize my time effectively. I will study every night and keep up with my work. I will study hard and get good grades. I will study hard and make sure to go to class. I will study hard and not slack. It's hard for me to stay focused but if I find a nice quiet place I won't be distracted I will study hard and put school first. I will meet people who are in the classes I am in and will form a study group. I will study harder and spend more time on reviewing and studying. I will study more. I will take a variety of courses that will help me get a better grasp of what I am interested in for my career. I can I will take all the classes that interest me now, and try getting into research opportunities to be able to see what I will take some sample or orientation classes in different subjects to see which I like best I will take the time to study outside of class, take extra notes, and get help from my professors should I need it. I will talk to my guidance counselor.
I will talk to my professors and learn how not to be afraid to ask for help.
I will talk to the teachers and make sure I understand what I am learning and do my research.
I will talk with my advisor and make sure I have the right classes to graduate in four years under my major. It's
I will talk with people who are in the industry and ask how they like their jobs.
I will not be shy and put myself out there. I will try my best to talk to people.
I will try my best not to take on more than I can handle. I'll work on studying and completing my workload sooner.
I will try my best to make new friends on campus. I consider that is the best way to get used to a new
I will try my best to practice more during my spare time, and I think I may take part in some classes that help me to
improve my skills. Also, I think I can get some good advice from my advisor or even professors. Last but not
I will try my hardest to get all my coursework done no matter what it takes.
I will try my hardest to succeed, because that is all I can do.
I will try my hardest to succeed.
I will try to ask the senior there on how they manage their time between studying and social life.
I will try to be a respectful and courteous roommate in hopes that the person I share a room with will do the
I will try to be as welcoming and open to new people and experiences.
I will try to be more outgoing.
I will try to be open to meeting new people and not be very shy.
I will try to be prepared for classes and study often.
I will try to become really involved so that I can make new friends that share similar interests with me.
I will try to buy my own healthy food and go to the rec center.
I will try to get use to it.
I will try to have a more open mind about others and just accept that everyone will be experiencing the same
I will try to have specific study times everyday for each of my classes.
I will try to keep as strong of a relationship as possible with my family while still transitioning to independence.
I will try to keep in contact with my parents by phone and by email, but I also understand that it is time for me to
start being more independent. I know it will take time, but I will eventually be comfortable being away from home.
I will try to keep up on my studying and seek tutoring help if need be.
I will try to manage my time carefully and take advantage of study groups when I can.
I will try to meet new people and keep my mind off of it. If I have more people to be comfortable around I will feel
I will try to organize my time to give me sufficient time to study and manage my coursework.
I will try to schedule my time so that I have the opportunity and time to study and work on class work when I'm not
I will try to schedule plenty of time for studying and maybe try to find a study group.
I will try to spend time with my roommate and meet her friends in order to branch out. I will also keep my door
I will try to talk to a lot of people and join into conversations instead of just listening.
I will try to talk to new friends on my own initiative and try not be shy when I communicate with new friends.
I will use my planner to write down all my assignments so I can prioritize the things I need to get done.
I will use my time management skills so that I will be able to balance golf and academics
I will work as much as I can. I am also in the Freshman job guarantee program. My parents will also assist me in
I will work at it. But that's life, isn't it? It is human nature to be concerned about that which we are new to or not in
I will work at the Mn state fair this year, get an on campus job, and put in as many hours as I can. I will also keep
I will work hard in class, and if I am still struggling I will seek help.
I will work on these things by exploring how (what methods) I understand material better in order to fulfill my goal
I work on it a bit in high school. I will continue to work on note-taking and study habits.
I worry most about being able to manage the stress of college. The most likely solution for me is to have a
I would contact the career center.
I would definitely try to engage myself with activities that are offered on campus and also meeting new people
I would have to be interested in each one of people in the university and try to say Hi as many as I can.
I would keep track of all my spending and not just make random purchases because I have grants.
i would like to earn more money and new experiences
I would like to have a job while on campus.
I would like to join as many organizations as possible and to be active within each and everyone of them. I am
I would like to schedule a meeting with an advisor to help plan out an academic schedule that will find a major that
I would need to talk to some people about how I will be able to pay for things and most likely take out loans.
I would stick with my current major for a year and if I do not like it I will switch out.
I would try to manage my workload well and put in my best to do well in the class.
I'd like to take a part time job during the first and second semester of this school year.
If I am struggling with writing a paper, I will talk to my professor or go to the Student Writing Center. If I do get a roommate that I have a problem with, I will just get over it and we should be able to get past our problems and move on. We don’t always have to be with each other so it would not be that bad. If I were to develop a habit of using a daily planner, I would have less difficulty deciding what to do, and when. Note-taking outside of class will also make note-taking in class much easier, but most important will be developing ignore it and hope it goes away. I'll be in a new place, and I'm not used to that. I think that I'm just nervous that I might not be as open as I was in. I'll be taking mostly general classes my first year and during that time I'll be able to figure out more what specific direction I'll check out my housing situation as soon as the information becomes available. Then, I'll decide what to do. I'll definitely be utilizing the tutoring on campus. I'll figure out what I want to major in by taking a variety of classes my freshman year. I'll get used to being away from home. Everyone is going through the same thing I am. Keeping busy with. I'll have to study harder than in high school. I'll just have to wait and see how class goes and address how much time I need to put aside for studying and such. I'll look online atonestop and ask upperclassmen for help. I'll make a conscious effort to be extremely friendly to everyone I meet for at least the first few weeks. I'll make sure I manage my time well. I'll maybe join groups possibly to meet new people. I'll probably join at least one student group, if not more. Also, because I'm living in an apartment near campus, I'll try my best. I'll try to be really outgoing and reach out to make friends, not only during Welcome Week, but also by looking into I'll try to get more involved to get to know others. I'll work hard and continue what I've already done in high school. If I still need help, then I'll ask. I'm a little nervous about being away from all the action on the Minneapolis campus, but I'm sure that Welcome Week will help me practice getting from St. Paul to Minneapolis, and help me adjust to living in St. Paul. I'm absolutely in love with my girlfriend, who is still in high school. I'm hoping to be able to balance her with my college life. I don't want to associate myself in one direction too much, but would like to be able to maintain both. I'm afraid I won't have enough or any extra money to spend for the year. I'm afraid that I cannot do well in my academic coursework. This is because I have to get excellent result to fulfill my scholar's requirements so that I can continue receiving my scholarship. However, I will try my best. I'm already part of the job guarantee program so I plan to keep up to date with the information regarding how that works out so I can find a job and hours that work with my class and study schedule. I'm already working. The U has denied financial aid and will not even allow a subsidized loan. I'm working on securing a job during the year, but that won't be enough. I really don't have another plan of action besides I'm always keep thing to the last minute. I don't use time wisely. I'm just going to make sure that I study as much as possible, but not to the point where it is becoming I'm an international student, and I plan to study biology as my major, I know there will be a lot of vocabulary to study in this field, and I am wondering if I can do well in class and I want to know, in which way I can learn a word I'm fairly sure I changed my housing preferences too late and am going to end up in an LLC in Frontier even though I applied very early, changed the preferences before the deadline, and requested a single in Centennial or I'm filling out all the financial papers that come. I'm getting a bike and exercising I'm going to apply to places and hope someone takes me. I'm going to be very organized in the way I go about doing work for classes to make sure I don't fall behind. I'm going to explore my options, and see if I can find out what I really enjoy doing. I'm going to make sure I make time to study, and ask questions when I need to. I'm going to need to learn how to develop some good study habits and then this won't be a problem. I'm going to put more time into studying than I normally would and cut back once I feel comfortable with my I'm going to try and be more outgoing rather than shy and timid. There is no way I'm going to make friends if I'm going to try and make sure to have a balanced schedule and make set times for studying and homework. I'm going to try not to take on more than I can handle, and try to study sooner rather than last minute. I'm going to try some courses that I may be interested in and see if anything really clicks. I'm going to try things out and see if my major is practical I'm going to try to be as outgoing as possible, keep my door open and try to meet as many people as possible. I'm going to try to introduce myself to as many people as I can.
I'm going to work hard and not put off assignments until the last minute. 
I'm going to work on being more outgoing.

I'm in expanded housing and that freaks me out a little. I just need to think positive. 
I'm just going to be myself, and be open-minded and friendly 
I'm just going to be open to people. 
I'm just going to get involved and be open to any and all possibilities. 
I'M JUST GOING TO ROLL THE DICE AND SEE WHAT HAPPENS 
im just going to to it. 
I'm just going to try and buckle down and study harder than I did in high school. 
I'm just going to try to do my best to make my money and time worthwhile. 
I'm just going to try to relax, be myself and remember everyone is in the same boat.

Introduce myself to others through Facebook and while moving into my dorm.
Introducing myself to my teachers and asking them for pointers to success, as well as learning their tutoring
involving myself in the campus as much as possible
Is there a way to get a job to pay off the loans for tuition or supplies.
It helps that I am surrounded by other people that are also coming into college alone and looking to make friends,
and I will just try to be outgoing and comfortable with new people as I adjust into college.
It is not easy to make friends from all over the world.
It should not be that big of an issue. I plan on living with my dad, and after gas and insurance I should walk away
with 6,000 dollars or so from my job. My dad plans to chip in some, and I have 10k in the bank already.
It's all about my attitude. If I go in ready and excited to meet people, I will hopefully be able to be outgoing and
friendly. I only worry that I may seem antisocial because I need alone time to recharge every once in awhile.
its not that big of a deal
It's something that I'll just have to learn as i go.
I've already begun searching for jobs on and off campus
I've applied for all sorts of scholarships and have been working for a very long time in order to save up money.
However, college is expensive and it won't be enough. I have thought about getting a job during the school year,
I've applied for scholarships as well as planned out my financial goals but am concerned I may not meet them.
I've been churning ideas over in my mind for a while now, and I have narrowed down my thoughts a bit. I think
that with time I will come to a decision as to which major/career path I'll end up following.
I've been considering doing ROTC starting fall 2010 to help cover finances.
I've been doing as much as I can to figure out what I need to do.
I've been exploring different areas of study and careers that could work for me...
I've been looking at bus schedules
I've been looking, and I will talk to people to find out what they did. Maybe I won't have a job until second

I've considered getting my bar tending license because I've heard they make pretty good money. I also have a job
at the Gap and I could transfer to the store in Mall of America. I'm also going to keep trying for art scholarships,
I've considered the fact that I will grow accustomed to my surroundings after being there for a while. I have
considered also that there are resources at the U that can help me, I just have to contact them.
I've contacted human resources in an attempt to find a job through the U.
I've filled out the FAFSA in order to receive assistance to pay tuition, but I want to avoid loans until I go to

I've looked into my options
I've narrowed my choices for a major down to a single (albeit broad) category. The indecisiveness concerning a
choice for a major is not the primary concern, however, that would be eventually transferring to the CBS. There
I've never really had to study for a class.
I've put my application in at a lot of places, and kind of checked out one stop, but I'm looking for a job as a Math Tutor because I want to be a Math teacher and that would help me get some practice in.
I've taken the "Relationships 1001: Building new friendships at the U" Welcome Week activity. Besides that, I've
decided to be involved on campus activities on a big level, since I'm going to be living off-campus with my brother,
I've talked to my parents about how much they can aid me in college and right now I'm waiting for my financial aid
status so I can decide what to do from there. If I absolutely need to take out loans, I will, but I want to try to

Simply creating a schedule and finding what works for me is how I will deal with my academic coursework. Simply doing more research about what is going to be expected of me for my classes and possibly talking to upperclassmen who have gone through the same programs and have advice or information. Simply just get to know everyone I meet. Simply just thinking deeply about it. Simply through participation I hope to adjust and be better able to manage time. Simply try not to worry about it. Simply trying to narrow the field of options that are presented to me. Since I am not in a freshman dorm I am concerned it will be harder to meet other freshman. Since I have immune deficiencies, I have decided to commute from home where I will be less likely to become ill. I will still be under the care of my parents and the doctors I have seen for my entire life. Some ways that I could prevent stressing about academic coursework would be; Having a good time management plan. Not partying too much during the first couple of months of school. Lastly, just having a level Soul searching

testing out different areas of study and follow what I want to do instead of what I think I should do.

Thanks to dead grandparents, the first year is paid for. I will work as much as my academic schedule permits and
That we won't get along because I'm homosexual, or that I just won't get along with him in general, but that we
That's pretty much just my concern for Welcome Week, not the whole year. I have a feeling it will resolve itself.
The amount of studying and work that will need to get done
The best I can think of is just sitting down and studying when I need to study and just getting things done before I
the gym.
The harder the course load is in college compared to high school. If I can do a good transition or even keep up
The idea that freshmen gain weight during their first year in college. The thought of buying fast foods rather than
The obvious way would be to work more. That would normally not be a problem but with college I will have even
The only thing I can do is go to the U with confidence and see what I will have on my plate. I will have to work
The reason I am up at the U is to study, and I will have most of my time to study! I'm not involved with work up there or classes for 8 hours a day, so doing course work shouldn't be a problem! Plus, everyone else is doing the reason I decided to go to Minnesota is my education.

if I don't care about my education, I wouldn't even decide to go to college.
The UofM does not offer a specific major for my needs so I am looking into other similar options and what classes
The way I should study would determine what kinds of living situations, friends, concerns I would have the rest of the time.
The Yellow pages have been very helpful in beginning to narrow my search down as to where I can continue. There are so many options, and I still don't know what would be a better major for me. Although I'm sure about my major, there is little I can do but explore my off-campus options and wait to hear about my status on the priority waitlist. There's not much I can really do other than apply for scholarships for next year to help pay for my education. If I can't find any jobs, they wouldn't let all those students who missed their orientation not get any classes. They're all in the same place I am and want to meet new people too.

Think about it.
Think about it better.
Think back to High school Class and what I did to finish.. now do the same thing just multiply 100
Thinking about it.
Thinking about my future.
Thinking carefully about the way that I spend my time
Thinking of getting a job throughout college.

This concern usually sorts itself out with no problem-I've never had trouble making friends, but obviously it's scary. Through communication

Through organization of time, by allowing myself enough time to prepare for class.
Through Welcome Week and by walking around the dorm.

my roommate I will get in contact with them to start getting things on the right track.
Well, at the moment I am still waiting to see in what type of dorm I will be in. After I find that out, I will address the
Well, I have not received information on housing yet or not. I am just concerned about having to commute and/or finding a place to stay while schooling. I'm sure I'll figure it out by the end of Summer. 

Well, I just hope I have a good roommate that won't steal my stuff and I'll be fine. If I get a bad roommate, well, I will really have no ideas.

Well, I'll try to talk to people and get to know them, but sometimes it's hard to find a common interest between the both of us. I have no idea how I'll make friends. It's easier for me to make friends with my old friends there and well, I'm just worried that the workload will be a lot larger than I am used to, but I'm sure that managing my time well, I've always had good study habits and forged strong relationships with my teachers. I intend to continue on this same path by getting to know my professors, showing up for class, seeking help when I need it, and finding a well, I've heard from my brothers that when you live in the dorms you can't help meeting tons of people. That's well, just to figure everything out. See what I need to bring and who I will live with for the year. 

Well... spending time studying is critical as far as academic success. I'm going to try and avoid distractions and we've attempted to budget out the first year and that is just overwhelming. I've been trying to save as much as possible. What am I good at that could lead to a possible major and what interests me in a major and career. 

When do I need to take out my loans? 

When I think about how I am going to deal with my coursework I tell myself that I will make it my first priority. I will use self discipline to manage my time and keep organized so that I don't fall behind. I will also make sure that I when in doubt, take too many notes and study too long until I find the right balance. 

Which major or subject makes me the happiest? 

Which places are most and least conducive to studying? 

Creating and implementing boundaries for social/fun time 

Who cares? 

Will I be able to put off loan payments until after graduation? 

Will I be able to pay off the loans after graduation?

Expanded housing
Family live close to campus
Family situation
Family will move in
Filed housing application late & would have been required to sign up for apartment for greater chance of housing,
Found a more accommodating location
found cheaper housing
Friend had an apartment
Friend offered a room not far from campus
Friends, save money.
Had a different opportunity
Haven't thought about it
Health issues
helping a friend keep her apartment
hockey
Housing scholarship at a frat
I am a student parent
I am mother with two children
i am on the wait list for a dorm
I am still on the housing waitlist, so I am not for sure if I will be on on or off campus yet
i did not want to pay the extra cost.
I don't like to live with a roommate
I had the opportunity to live with relatives close by for free.
I have a young child.
I have already lived on campus and wanted to live with a close friend
I have responsibilities at home

Living off campus is cheaper.
living with my sister
Mental health/anxiety
More affordable
More convenient financially for my family for me not to live on campus
Much cheaper to live at home, which is only 30 minutes away
my dad lives 3 miles from campus, save money, bring all of my stuff with me
my house burnt down so we just rebuilt
My sister wanted me to stay home.
No parking spot guarantee.. and I love my job at home
NOT SURE YET WHEHER I'LL BE ON OR OFF CAMPUS.
Off-campus housing was cheaper and very close to the U anyway
off-compus has better price and environment
Parents as well as cost
Parents didn't want me to AND the cost
PETS!!!
planned on living in off campus apartment but roomate didn't follow through
preferred to live in an apartment
Preferred to live in apartment.
Private Scholarship housing
Received shcolarship to live at fraternity
recieved a scholarship to live somewhere else
Residence halls felt crowded and run-down.
responsibilities at home
saving money
scholarship house
seemed like a waste of money when i live 7 miles away
sports
Taking care of younger brother
There was a different place I wanted to live.
thought it would be wiser to save the money
too close to home
too expensive
too late to sign up
U ppl did not give me enough money, I deserve to be in honors and have a complete and full ride waitlist
want to live at home so can help family
Wasn't able to meet deadline for housing
won scholarship for off-campus housing

I am not too nervous about living on campus.
I am not very anxious about living on campus.
I am not very anxious about on campus housing.
I am not worried about anything. I am pretty use to campus life because I was in the Bridge program. I am scared that my roommate and I will not always get along. I am shy, so I am afraid that I can't get along with my roommate. I am so excited to get to know my roommate better! I feel like we will get along well and spend a lot of time together. I am somewhat anxious about finding good quiet places to study. I am somewhat anxious about having enough space in my dorm because I am in the quad expanded dorm, and I am the most nervous about getting along with my roommate, making sure our room stays clean, and making sure we are comfortable. I am used to a lot of privacy and alone time when needed so it will be hard for me to adjust to having people around all the time. I am very anxious about getting along with my roommate. I am very anxious to get away from home and start living on my own schedule. Although it will be different, I know I will benefit greatly from it. I am also very anxious to find out if I am for sure living on campus, and if so, rooming with my roommate and the people in my dorm. I am nervous that I might not get along with my roommate but I am hoping we do. I also am anxious to make many new friends and live on my own. I am very excited to be away from home and on my own with people my age. I am very excited to move in and decorate my room! Also I am looking forward to see who lives close to me! I am waiting to see who my room mate is, and what hall I will be in for the next year. I am worried about balancing social interactions and studying. I am worried about dealing with everyone else on the floor. I am worried about having my stuff stolen from me. I am worried about how my roommate will feel about my sexual orientation. I am worried about if my roommate is not polite. I am worried about space. I also have never had to share a room with another person or share a bathroom with my roommate. I am worried about taking on the responsibilities that come with living on your own. I am also worried about the quality of the campus food. I am worried about the relationship between my roommates because I've never lived in dorms in my life. I am worried about who is my roommate and what kind of person they are. I am worried it will be too loud and crazy, so that I will get sleep deprived. And I am a little worried about security. I am worried that I won't get along with my roommate. I am worried that my room mate will hate me. That would not be good. I am worried that my roommate is not going to be compatible with me, it will make for a difficult year living with them. I cannot wait until I get my roommate assignments!!! I can't think of anything. I can't wait to be on campus and able to meet new people. I can't wait to meet a bunch of new friends. I concern about my English-speaking. Since I'm going to live in campus, my speaking ability may become a concern. I connect best with older people, have already lived away from home, and am worried I won't even want to do not know. I do not want a three person room; one person always gets left out. Plus thats a lot of different personalities. I don't know if it will be quiet enough at night. I don't get along with my roommate. I don't have any real anxieties. I don't have many concerns about housing. I don't know if I made it into the dorms yet. I want to know! I don't know if I will actually be getting housing until August 17th. I don't know if it is going to work out with my roommate and I. I don't know where I am going to be living yet. I don't know who is going to be my roommate, but I don't worry too much about it. I don't know who my roommate is. I don't know who will be my roommate, so I can't learn what kind of a person she is and I'm not sure if we can get along well with each other, and I'm worried about how can I get on well with my roommate(s) when we come from i don't know. I don't like having to share a bathroom. I hope I get the dorm I requested. I am a messy person with lots of stuff and worried and what the very small space will look like. I don't not if I can find the place.
I don't really know. Getting along with my roommate?
I don't want to get stuck with an asshole roommate.
I ended up getting a single room instead of a double so im worried it will be harder for me to meet new people.
I fear having a roommate that is not accepting of me.
I got assigned to an apartment (U Village) and it costs more than i was prepared for. i don't know how well i'll
i got in a 4 person suite in my third choice dorm.
i would really like to switch into a two person room in territorial or fronteer with my buddy.
I have a difficult time making friends.
I have a single, so I guess I'm most worried about getting to know the other people in my dorm.
I have a special habit, using squat toilet. I know this is really strange but I hope my aparment has a squat toilet.
I have a very special diet and I'm not sure if there are kitchens in the common areas of all residence halls and
I have always had my own bathroom so sharing with a ton of girls with be very interesting...
I have been on campus since June 21st so I basically have my opinions.
I have never lived with anyone. I am an only child who lives in a mid-sized house and has never had to share.
-I have never shared a room with anyone
I have no idea where I am living.
I have no idea who my roomate is so that makes me really nervous. I hope that we will be able to relate to each
I have no idea.
I have no real concerns about campus housing.
I have not gotten my housing assignment yet so right now I am most worried about showering and the bathroom
situation. Hopefully I will get the roomate I requested and the room type I wanted so that won't really be an issue.
I have still not received any information regarding to my housing assignment results.
I hope I can get on well with my roommates and we can help each other both on study and daily life. I can also
I hope I can live on campus.
I hope I don't have a roommate. I prefer having my own room.

I hope my roommate is fun!
I hope my roomate is not terrible.
I hope that I meet a lot of new people in my dorm.
I hope that my roomate is nice, respectful, and easy to get along with.
I hope that my roommate and I are compatible.
I hope that my roommate and I get along well.
I hope the bathroom situation isn't too horrible, and that I will get along with my roommate
I hope the building and room type I get assigned to are ones that will work out well.
I hope to get to know my roommate well and get involved in campus activites.
I just hope that I like my room mate assigned to me. Hopefully, I get to meet new people and make many friends.
I just want a good roommate that isn't a complete jerk to me. I would also like to be close to all of my classes so I
I just want to figure it out because it is going to be way different than living at home.
I just want to know my room assignment as I haven't found out yet.
I just want to know what dorm I am living in and who my roomate is. I hope I can meet some really close friends
I just would like to know which hall I'll be living in and who my roommate is. Other than that, no anxiety really.
I kind of worried about the ambience on the campus hall, will it be too noisy? Also, as an international student, I might have some difficulties adjusting to my new life. I need to get a map and know how to get a place from my housing. I really don't have any worries about on campus housing. My feelings are that it's going to be an experience either way, whether good or bad, and I need to take advantage of it and learn what I can from it. I really hope my roommate and I will be compatible. I really want my best friend to be my roommate but there's no guarantee that she will be.

I really hope my roommate and I will be compatible. I really want my best friend to be my roommate but there's no guarantee that she will be.

I really want to be on the East Bank. I really want to know where I'm going to live, but as I can't change that, if I'm in my first choice housing I'm a little worried about being far from the majority of campus and walking across the bridge every day. I sent my housing app in late... but I was assured by someone that there would be a room for me...

I still don't know who my roommate is. I still have not found out if I will be living on campus so my biggest worry is whether there is room or not. I still have yet to find out if I have received on campus housing.

I submitted a hall transfer request and I really really really want my assigned room to be changed. That makes me tend to get claustrophobic easily and being in such an enclosed space with so many other people worries me. I think I may have been put into a LLC that I don't want to be in and I'm afraid I'll end up living in my second-to-last choice hall in a double rather than the hall I wanted in a single. I don't know what to do.

I think I'm sharing a room with 2 other people and I'm a person who is more reserved and likes alone time. I think it would be hard for me to live with another person in the same room. We might have different living styles. I want my dorm room to feel like home, I want to feel really comfortable there, and I'm worried that I won't. I want to be able to meet a lot of great people, and I hope that happens. I'm also anxious to meet my roommate, I want to be sure I am disciplined about my study hours. I want to find out my roommate. I want to find out my roommate and get to know them as well as other individuals in the housing structure. I want to find out who my roommate is.

I want to get a long with the people that I will be living with. I want to get moved in and settled. I want to have a big room. I want to know more about my roommate. I want to know my roommate so we can get to know one another. I want to know what dorm I will be living in. I want to know which dorm I am in! I want to know who my roommate is. I want to know who my roommate is and I hope we are similar. I want to know who will be my roommate. I want to know who's my roommate.

I want to make sure I get along with my roommate. So far there are not any problems. I want to meet my roommate, and I hope that we get along well. I want to meet my roommate and see how well we get along. I was accepted late, so I am worried they will not have enough housing for me. I was assigned an apartment because I applied late so it will be more of a jump than those students that are living in Bailey Hall so I'm concerned that I won't be close to anything.

I was put in to expanded housing and that upset me. I am very picky about my study time and I don't need to be living in a 4 person residence hall suite, which was pretty low on my preference list. Not sure if I'll like being in a single residence hall and have always lived with at least seven people my whole life. I'm very close to Bailey Hall so I'm concerned that I won't be close to anything.

I will be living in Bailey Hall in St Paul campus during the first year, so I am worried about the winter when I go to class. I wish I can have a good study environment. I wish I wasn't on the west bank. I wonder who is my roommate?

I worry about getting along with my roommate. I worry about not getting along with my roommate and feeling at home. I worry about not getting along with my roommates. I would like to know where I will be living and who I will be living with. I'd like to find out who my roommate is so as to begin thinking about how our relationship will work. If I can afford it.
If I can get to class on time from the UV.
If i could be able to relate and have a good relationship with my roommate

I'm not anxious about anything.
I'm not anxious I'm very excited.
I'm not in a dorm
I'm not in a residence hall which most freshmen live in, so how can I deal with the people around me?
I'm not pleased with where I ended up. I was assigned to my fifth dorm choice and my last choice of room type.
Besides that, I am the expanded room host and would have to move half way through the year.
I'm not positive I have a dorm, or where I am going to live.
I'm not really nervous about anything yet. I'm just very excited to get to know everyone!
I'm not sure whether I can be close friend with my roommate and whether I'll soon feel at home in the totally new

I am most looking forward to meeting new people.
I am most looking forward to meeting other people around campus and making new friends.
I am most looking forward to simply being on campus and living the college life. I am excited to be living around
I am most looking forward to the independence.
I am ready for the independency!
I am really excited to get to know other students and develop lasting relationships with them.
I am really looking forward to freedom and to meeting so many new people!
I am really looking forward to meeting a lot of new people from different places.
I am really looking forward to meeting the other members of the West Bank Arts Living Learning Community. I
I am very excited about being a part of the U community.
I am very excited to make as many friends as possible. I am also excited about having my own place to call
I can make friends easily by chatting with them at the end of the day. I can easily walk to my classes without
I can make friends with students come from different countries and I can also start my new life independently.
I can make many friend!
I can meet and make lots of friends.
I can use library easily and live comforthable.
I can walk everywhere.
I cannot wait to meet my new classmates and establish new friendships.
I cannot wait to meet new people and experience living on my own away from home.
I can't wait to be living the "big city life." It's all fast paced and fun!
I can't wait to decorate my room and meet everyone in the dorms.
I can't wait to meet new people and build close friendships with the people in my residence hall.
I can't wait to meet new people!
I can't wait to not have curfews.
I can't wait until that first home football game against Air Force at the new TCF Bank Stadium. It's going to be an
i dont have to clean a huge house every weekend
i dont know
I don't know
I don't know yet.
i dont know.
I found out I'm living in Sanford which is not a freshman dorm. I think it will be easier to study and get to know
I get to decorate my room myself and go shopping for things I can put in my dorm. I'm looking forward to having
I get to live with my teammates.
I have a burdening desire to have a quiet learning environment
I have a sweet roommate
I have no idea. Everything I guess...(Sorry, I'm really bad at this questionnaire thing)
I hope to be able to feel part of the campus community,
I hope to make friends with more people and will get used to my new life as soon as possible.
I know it sounds cliche, but I mostly look forward to meeting tons of new people and building life-long friendships.
I like being surrounded by people my age.
I like that on campus housing is a great place to meet new people and make friends.
I look forward being more independent of myself.
I look forward to being close to classes and campus events. I look forward to being a part of the campus life 24/7
I look forward to being close to everything and experiencing first time college adventures with other freshman.
I look forward to being in the middle of the action.
I look forward to getting to know people in the dorm.
I look forward to having an American roommate and get along with him.
I look forward to having complete freedom, with more responsibility.
I look forward to meeting all sorts of people who have the same interests as myself.
I look forward to meeting new friends.
I look forward to meeting new people
I look forward to meeting new people and exploring the campus.
I look forward to not commuting long distances to get to classes.
I look forward to participating in activities and studying with others in the residence hall.
I look forward to the sense of community that develops among students that live together.
I'm looking forward to being able to live on my own. I get to decide now what I want to do and when I can do them. I'm looking forward to being able to get some independence. I'm looking forward to make a bunch of friends. I'm looking forwards that I could make a lot of friends. I love the location and I am excited to explore the city. I met my roommate already and we're already getting along great! Plus, we got a 2person suite! I most looking forward to living on my own, as well as meeting and getting to know new people. I planned to live in the Super Block so I have the opportunity to meet a lot of incoming freshman and other I really looking forward to living with someone else other than my parents. I really want to get involved in different activities. Being on campus gives me that opportunity-I'll be close to all of them. I really want to have a roommate from another countries- Not from Korea (Because I am Korean.) I want to learn their cultures and languages. I really think it would be great for me to know people who are different from me. I think it will be fun to live with a bunch of other people my age and just always be there. I think it's really cool how close it is to everything. And I think the football games with the new stadiums are going to be really exciting. I think the thing I am most looking forward to on campus is meeting new people. I want to experience being with a community of fellow students. I want to find a native American to be my roommate. Since I am a foreigner and this is my first time to come to America so I don't know much about cultures, habits, lifestyles in America, a native American can be a good thing. I want to have an American roommate and make good friends with him. For the reason that I can improve my oral I will be able to meet lots of people just by living on campus. I will be able to meet many new people and be able to participate in activities. I will be able to walk to class as opposed to having to drive to campus or have a long walk. I will be in the middle of the U of M community and will be able to meet more people. I will be living in the school environment with my other classmates. I will get to meet tons of new people in my dorm building, and I think it will be a lot of fun with different activities I will hopefully meet a lot of friends, and we will seem like a big neighborhood! I wish I can make a lot of friends with the same interests. I wish I can make friends from different countries, different major, and learn from the various uniqueness. I won't have to bother with the traffic. I'd like to decorate my room like my second home and I want to make many friends there. I'd love to have a native American guy to be as my roommate. I'll be able to meet new people. I'll be close to all my classes. I'll be close to everything and can walk or bike places, i don't have to worry about transportation I'll enjoy living amongst fellow students and friends. I'm a very social person, so I'm definitely looking forward to living with so many people who are eager to make friends. I'm excited about being able to walk to places as well as meeting many different kinds of people in the dorms. I'm excited about the feeling of community. I really want to be a part of the U's community! I'm excited at the opportunity to meet people and the fact that there will be constant options for activities. I'm excited for the sense of community created by shared experiences. I'm excited to be away from home! Although, I think I'll miss it, but I also think it's time I walk on my own two feet. I'm excited to be close with my peers and meeting so many new people. Being close to my classes will make it easy for me to feel like I'm part of the community. I'm excited to be living with people that will be my friends and having the freedom to go anywhere by walking. I'm excited to be on my own and away from my parents. I'm excited to be surrounded by other freshman that are anxious to meet new friends, just like me! I'm excited to be surrounded by people. I'm excited to go off and live on my own. I'm excited to meet a bunch of new people and hopefully make a lot of friends. I'm excited to meet a lot of new people and have new things to do. I'm excited to meet all the new people in my dorm. I will be close to my classes and activities on campus. I'm excited to meet my roommate and get used to the college living lifestyle. I'm excited to meet new people and be close to my classes and activities. I'm excited to meet new people and make lifelong friends. I'm excited to meet new people and to have fun. I'm excited to meet new people in my dorm and build friendships with them.
I'm excited to meet people from all over.
I'm excited to share a room with someone and to meet new people that live in the same dorm.
I'm going to be around so many new people, 24/7. It's also new freedom I never had at home.
I'm hoping it will be easier to make friends.

I believe it is part of the college experience.

I believe it is where you can get the full college experience.
I believe it will be easier to adjust to college life and meet new people on campus rather than off of it. I believe it will enhance my college experience, and it's a way to be away from home. I believe that it is essential to live on campus in order to grasp the aspect of the "college experience." I believe there is more of a sense of community if you live on campus. I can be closer to college resources and be a part of the University community. I can be familiar with the school easily. I can be independent. I can easily make friends with freshmen there. (There are 80% freshmen choose to live there) I can get access to more interactive community activities. I can get to know many people to build a close relationship. I can get to know more people. I can live closer to my classes. I can make friends with people who are relatives while they have same interests with me. I can make many friend and it very convenient. I can not afford an apartment. I can't afford an apartment. I can't commute from Chicago, IL, and I wanted to experience the full college experience. I can't commute from home, and dorm life would prepare me for the struggles of college life. I can't commute there, considering I live in Illinois. I can't commute, considering I live in Illinois. I can't live at home because I live so far away. I can't live at home in Wisconsin... I can't really commute from Chicago... I can't wait to meet all the new people! I choose to live on campus because I believe it is a good way to meet new people and learn how to live on my own. I choose to live on campus because I want to be involve in my college and live close to my classes. I choose to live on campus because I want to get the full experience of being a part of the University, and getting involved. I choose to live on campus because it will be nice to make some people to know. I choose to live on campus because my home is about 4 hours away from campus and I want to gain the campus experience. I choose to live on campus because this way I will be with other freshman whom I can relate to. I choose to live on campus for the college experience and to have an easier time getting involved and meeting people. I choose to live on campus for the traditional college experience. I choose to live on campus to feel more involved and part of a community. I choose to live on campus to get the full experience of college at the U of M. I also choose to live on campus because it is so much easier for the first year. I want to become independent, but I do not want to commute. I chose it for convenience as my parents live out of town and for the benefits of being on campus. I choose on campus housing because I didn't want to have to commute. I chose on campus housing so that I will meet other students easier and be a part of a community. I chose the dorms for the experience and the independence. I chose to live in the dorms because besides the fact that my parents would probably make me my first year, it just makes sense. I chose to live on campus because I currently live six hours away and that is a long drive and that would cost a lot. I chose to live on campus because I do live so far away and I need to branch away from my family home. I chose to live on campus because I have found that living in the dorms is a great help if you want to meet people. I chose to live on campus because I live too far to commute from home and would like to form close friendships in college. I chose to live on campus because I really want to get the whole college experience and feel like a solid part of the community. I chose to live on campus because I want to feel more of a sense of community, and I think it is more affordable than commuting. I chose to live on campus because I want to have this experience. I chose to live on campus because I want to meet new people and because I will always be close to resources. I chose to live on campus because I wanted a different independence coming into my life. I chose to live on campus because I wanted to feel connected to the University and I feel that I'll be able to focus better on my studies. I chose to live on campus because I wanted to get that "college experience" & be in that atmosphere. I chose to live on campus because I wanted to meet new people. I chose to live on campus because I'm from Wisconsin and it seems to be the most logical choice. I chose to live on campus because it is close to all of my classes and I plan to be very involved in campus life. I chose to live on campus because it is the best way to meet new people and I feel I will know my way better. I chose to live on campus because it was the easiest and most convenient form of housing. I chose to live on campus because most students live on campus for their first year, and it's a good way to meet new people.

I live in New York...so living off campus wasn't really an option.
i live in rochester. i had no choice
I live in south eastern Wisconsin, and I'm not commuting, and I didn't want to spend more on an apartment.
I live in Texas, off campus housing is not an option. Apartments are also expensive.
i live in WI and it would be a pretty tough commute.
I live in WI.
i live in Wisconsin
i live in Wisconsin and i want the full college experience
I live in Wisconsin and I wanted to meet other freshman and create a niche for myself at the U.
I live in Wisconsin and its too far away to live at home
I live in Wisconsin and the easiest way to attend school in Minnesota is to live on campus. It's also an experience
I live in wisconsin and there is not much of a choice.
I live in Wisconsin and think it's too far to commute :-p
I live in Wisconsin and want to get the full college experience.
I live in Wisconsin now, no other option at this point
I live in Wisconsin so commuting is out of the question.
I live in Wisconsin so it is easier to live on campus than to find an apartment
I live in Wisconsin, so it was my only option that I could have chosen.
I live in wisconsin, so my options are limited, but i really like the campus community the school seems to offer. It
I live in wisconsin.
I live in Wisconsin
I live only 10 miles away, and I want some independence. Also, I think that living with someone you don't know is
I live out of state
I live out of state and had no other option. It has also been proven that students that live on campus do better
I live out of state and I wanted to live in a place that I would meet a lot of new people.
I live out of state and I wanted to live in a place where I would meet a lot of new people.
I live out of state and it would not make sense to live off-campus.
I live out of state and would like the comfort of a small community away so far away from home.
I live over 3 hours away, and I didn't want to rent an apartment
I live over 5 hours away so there was no way i commuting.
I live pretty far away from the campus and the easy access to different activities.
I live REALLY far away.
I live six and a half hours away. I am also a freshman, so I wanted to live in dorm where there were others like me.
I live six hours away. Plus, I feel that living in the dorms is an integral part of the college experience.
I live so far and it was the easiest way for me to feel connected to the University.
I live thousands of miles away.
i live three hours away, it's all i could do my first year..
I live three hours away.
i live to far away to commute and i want to meet new people.
I live to far away to commute and I want to met people on campus. I also want to get used to the area.
I live to far away to commute and it helps you get involved.
I live to far away to commute, it will be a learning experience, and it is a good way to meet new people
I live too far away and want to experience true college life
I live too far away from campus
I live too far away to commute
I live too far away to commute and I do not have the money for an apartment.
I live too far away to commute and it is cheaper and more beneficial than getting an apartment.
I live too far away to commute, and I cannot afford an apartment. It is also the best way to make friends.
i live too far away to commute.
i live too far away to commute?
i live too far away to consider commuting.
i live too far away to live off campus.
i live too far away to travel from my home and I don't have effective funds to secure off campus housing.
i live too far from campus to travel everyday and living on campus will better allow me to participate in campus
i live too far.
i live two and a half hours away and I don't have enough money for anything off campus.
i live very far away and it is much cheaper and easier than off-campus apartments.
i live very far away and many people have told me that I will feel much more involved and part of the school if I
i live very far away from the cities and I don't want to go through the trouble of finding a place to live in the cities
i live very far away.
i live way to far away to commute or anything and also I want to meet new people.
i live way to far to be traveling from home to the U and also my friends are going to be living their
i live way too far away too commute.
i love campus
I love meeting new people and I feel like the dorm life is something I will quickly adjust to.
i love to meet new people.
i need somewhere to live while I go to school
i need to be more independent.
i need to encourage myself to grow as an individual and become more confident in myself.
i need to get out of my house and everyone said you should board freshman year.
i need to get to know the campus to help me study efficiently. Liveing on campus can help me get to know the
i needed to live somewhere near campus.
i never considered living off campus...living on campus is the easiest for my situation
i never really thought twice about it. My other choice would be commuting from Milwaukee so I don't think that will
i really feel that in order for me to feel a connection to the U I need to live on campus at least for my first year.
i really like the U of M campus and I think its the only way to really go through college.
i really wanted to experience the true college lifestyle and I believe that living on campus in a tiny dormroom will
i really wanted to feel like a part of the university community.
i saw it as a good way to meet people and how convenient it is.
i think every freshman should begin by living on campus
i think everybody needs to experience at least one year of "dorm living"
i think I will better be able to feel like part of the community, and it's a great way to meet people.
i think I will get the most out of college if I live right on campus.
i think it is a big part of the college experience
i think it is a huge part of college and growing up.
i think it is an easier way to meet people and create lasting friendships by living on campus at least your first year,
i think it is an experience that you shouldn't miss out on and it will give me an opportunity to make a lot of new
i think it is an important step in every student's college experience
i think it is important to me to live on campus to improve my independence and my social skills.
i think it is important to the college experience.

i think it is very safe.
i think it was the easiest to do.
i think it will add to my college experience.
i think it will be a good "freshmen" experience, and it will give me a great opportunity to meet all different kinds of
i think it will be a good experience as a freshman to meet a lot of people and learn more about the campus.
i think it will be a good way to meet people and it is very convenient.
i think it will be a great experience for me.
I think it will be a great learning experience and I did not want to commute from Burnsville every day.
I think it will be an exciting part of the college experience.
I think it will be easier and more fun.
I think it will help me connect with people more and get comfortable with college life.
I think it will help me fit in with the community more, but I really would like to live at home.
I think it will help me meet people and feel more a part of the U community.
I think it will help me stay connected to the school, both socially and academically.
I think it will make the college transition easier, and I will not have to worry about transportation to classes.
I think it would be a lot of fun, and I want to be around new people and experience college to the full.
i think it would be best to be with other freshmen who are in the same position as me.
i think it would be hard for me to enjoy college if I lived at home, because I wouldn't feel like a part of the
I think it's a great way to be very involved with the university and meet new people.
I think it's a huge part of the college experience. I wanted to be more connected with new people and the campus
I think it's important to learn about the campus and the other students which can be effectively accomplished by

I think it's nice as a freshman.
I think living on campus is part of the college experience. It is a way i will be able to meet a lot of new people.
I think that as a new student attending a very large university, I need to engage myself with the school. I have to
be on campus to really focus on my college career. Instead of being bothered at home or being distracted in an
apartment, I will be able to study and more easily attend student organizations and productions. Also, despite the
I think that it is a good way to meet people.
I think that it will help me get over my homesickness. Also, it will help me create friends.
I think that living on campus is a great opportunity that will help me adjust to living on my own after graduation.
I think that living on campus is important the first year for many reasons.
I think that will help me become a part of the campus community, it will help me to gain more independence as I
move towards complete independence from my parents and it will be a great social opportunity.
I thought I had to at least the first year of my schooling here, and it will be easier for me to meet people this way.
I thought it was an important experience to have.
I thought it was important for getting the true experience that college should be.
I thought it would be a good way to meet more people and I like that it's close to the University.

I thought it'd be a good experience and it's close to everything.
I thought on campus living might help me to find many good friends and mentors.
I thought that it would be a good experience to live in the dorms.
I thought that living on campus would help build new friendships with other students in my same situation.
I want a real college experience.
I want the convenience of a residence hall and food plan for my first year; I wanted an easy way to meet people;
it's easier to get involved in campus events and feel a part of it if I live on campus my first year.
I want the dorm experience and busing is a pain in the neck.
I want the dorm experience and, as an out of state student, it's more practical.
i want the experience
I want the experience of being in the dorms.
I want the full college experience and I want to be independent
I want the full college experience.
I want the full college experience.
I want the real college experience.
I want the whole college experience.
I want the whole college experience and it is much more convienient in my opinion.
I want the whole college experience.
I want the whole experience in the dorms of meeting new people and being on campus by my classes.
I want the whole experience of college, not just the academic part. I love meeting people and I cannot wait to build
I want to be a part of the U of M community and living on campus was the best way to do so.
I want to be a part of the U of M community, and living there seemed to fit.
I want to be able to experience everything college has to offer.
I want to be able to fully experience being a college freshman.
I want to be able to meet lots of new people who are my same age and in my same situation, and on campus
I want to be able to meet other students, not to mention it is much easier to get to classes.
I want to be able to meet people and develop friendships.
I want to be around others to help me progress both academically, athletically, and socially.
I want to be close to campus and I think that is where a lot of freshman live.
I want to be in the community
I want to be independent and I think it is a good way to start.
I want to be independent.
I want to be involved and immersed in college life. I think it would make college a more rewarding experience.
I want to be involved at the university.
I want to be more independent and experience college fully.
I want to be near my classes and on my own.
I want to be right on campus
I want to become a part of the community.
I want to experience living in a dorm.
I want to experience the life living on campus and to get to know others in the hall I am living in.
I want to experience the real campus life and be involved on campus. I think living on campus will also help me to
I want to experience the whole college life.
I want to experience the whole college package. This is a once in a life time experience.
I want to experience what it is like living in a dorm.
I want to feel better connected to the University, and take advantage of the resources I have here.
I want to feel like a part of the community on campus as well as live away from home.
I want to feel like a part of the community.
i want to feel what it feels like to live on my own for the most part
I want to focus on academics.
I want to gain a new experience, and be away from my home.
I want to get a sense of community and really feel like a part of the campus community and get to know people.
I want to get away from living at home and doing stuff on my own
I want to get away from my parents, and the dorms is where you meet everyone!
I want to get out of my house
I want to get that "college atmosphere"
I want to get the entire college experience and it's a great way to meet new people.
i want to get the full college experience
I want to get the full college experience
I want to get the full experience living in the dorms as a freshman
I want to get the full on experience of the U of M and I know the best way to do that is by living on campus
i want to get the most out of my college experience
I want to get to know my classmates and feel like I am a part of the University community.
I want to get to know people and network.
I want to get to know people for my first semester in Minnesota!
I want to get used to the campus and meet people.
I want to have a traditional college experience.
I want to have the "full college experience" by living in the dorms, and it is the most convenient for me.
I want to improve my English skills because I am an international student.
I want to live "on my own" and my parents don't live very close by the Twin Cities.
I want to live on campus so I get the whole experience of being a freshman in college and being on campus by
I want to live on campus, it is simpler for me.
I want to live on my own and socialize with other students.
I want to make a lot of friends.
I want to make as many friends as possible.
I want to make college friends and jump into the college experience.
I want to make friends and have the whole college experience.
I want to make friends right away.
I want to make friends with my classmates. Living on campus can give me the best opportunity to get to know other students. I also want to be a closed friend with my roommate. The other reason is that I want to have more I want to make the most out of my college experience.
I want to meet a lot of people and be involved in events at the U.
I want to meet lots of new people, and be close to my school
I want to meet many new people.
I want to meet more people and feel more apart of the school
I want to meet more people, and to have a real college life.
I want to meet new people and be close to my classes.
I want to meet new people and make friends.
I want to meet new people, and also it would be easiest to live on campus to attend classes seeing as I live far
I want to meet people
I want to meet people.
I want to move away from my parents and living on campus is an affordable transition. It also would be I want to take responsibility and live on my own.
I want to truly experience college life and feel more grown up and I can't do that by living at home
I want to.
I wanted a chance to be on my own and motivating myself instead of doing what parents tell me to do
I wanted a college experience.
I wanted make it as easy as it could be to get around the U. I also wanted to have the experience of dorming because I've always heard that I won't regret it or that if I don't dorm, I'll be missing out so I wanted to make sure I I wanted the experience and it's a better way to meet people.
I wanted the experience of living in a dorm, because it gives you the chance to meet new people. Also, I live 5 1/2 I wanted the experience of living in a dorm.
I wanted the experience of living with another person and in a housing community.
I wanted the experience. I wanted the full college experience and also, it was impossible for me to not live on campus. I wanted the full experience I wanted to be a part of a different community, and to get away from my parents so that I will be more prepared to I wanted to be a part of the community at the U and take full advantage of the freshman experience
I wanted to be a part of the community that the campus is known for; I thought it would be easier to attend class I wanted to be a part of the university community.
I wanted to be able to effectively participate in college.
I wanted to be apart of the campus energy.
I wanted to be close to my classes and get the experience of a dorm.
I wanted to be close to my classes and have the opportunity to meet a lot of new people at the same time.
I wanted to be close to my classes. I also live out-of-state and did not want to undertake the hassle of living in an I wanted to be in the center of things, and not have to stretch to get involved.
I wanted to be independent of home and learn what it's like to live on campus and get the "full college I wanted to be involved as much as possible with on-campus activities, be able to take as many classes as I I wanted to be more independent and meet more people.
I wanted to be one on one with studying, and mostly to live away from my younger siblings and parents.
i wanted to be out of my house and have the whole college experience.
i wanted to ensure that i received the complete college experience, and also to spread my wings.
i wanted to experience a dorm life.
i wanted to experience college
i wanted to experience college life and become more independent.
i wanted to experience college life.
i wanted to experience dorm life.

i wanted to get to know people that way.
i wanted to have a place to live close to my classes and be able to focus better which hopefully will result in
I wanted to have a real college experience and I think I'm too young to live by myself.
i wanted to have the college experience, have a room mate, be on camous, and be surrounded by other students.
i wanted to have the experience
I wanted to have the full college experience and start to become more independent.
i wanted to have the full college experience.
i wanted to have the full college experience and have the opportunity to be more involved.
i wanted to have to the full college experience, and to feel completely connected to the campus
I wanted to live on campus because I thought it would help me get better adjusted.
i wanted to live on campus in order to meet a lot of new people.
i wanted to live on campus so that I could get a better feel of the university and meet new people.
i wanted to live on campus to experience what it's like to live away from my parents in a more controlled setting
I wanted to live somewhere other than home and be close to my classes.
i wanted to make as many connections as possible.
i wanted to meet a lot of new people and have the full college experience of living in a dorm.
i wanted to meet a lot of new people and it is easier to do that while living on campus.
i wanted to meet a lot of people in the dorms.
i wanted to meet new people and feel connected; I felt like commuting would leave me "out of the loop."
i wanted to meet new people. I thought it would be a fun experience.
i wanted to meet people and create new friendships. I think moving away from home will also make me more
I wanted to really get involved and be a part of the University.
i wanted to receive the true "college experience" by living in a dorm. It will help me with the adjustment I will have
I wanted to start out college by creating bonds in a community and I think there is no better way than to live on
I wanted to stay connected to the University and be close to my classes.
i wanted to try it at least for one year to see what it's like.
i wanted to/ had to?
i was always told that living on campus is one of the easiest ways to feel connected and meet people.
i was basically given 2 choices, Sanford or Keeler Apartments.
i was living in another state and I need a place to stay in
I was told it is the best thing to do
I was told it was an essential experience, so that an individual learns to share their private space with others.
i was told it was an important part of college and it would be a mistake to skip it.
i was told it's a major part of the "college experience".
i was told students who live on campus are more successful.
i wasn't going to get an apartment, nor was I going to live at home and drive 400 miles to school each day. All
I will always be around people.
i will be a lot easier to get to classes
I will be close to my classes and I know I will meet a lot of new people.
i will be closer to classes.
I will be much familiar with the university and the students. I will be surrounded by people my age who are all making some of the same adjustments as myself. I will feel more connected with other freshman and will become more independent. I will have a roommate and it will be very interesting. I will immeditaly be part of the whole college experience and, being an international student, living on campus will help me feel more connected to the school. I would have felt like I was missing out if I hadn't choose to live on campus and I would have no other place to live.

I would like to move out of my house and have a traditional 4 year experience of college life. I would not like to commute from the suburbs. I would not like to live at home and commute. I would not want to live anywhere else because it is so easy to get around campus by walking or even just a bus. I'm coming from out of state, and I didn't want to bring my car or rely on the bus, so I need a central location. I'd like to get comfortable with my surroundings, and it's a good way to meet people, especially new students. I'd like to live less dependently on my parents.

I'd like to meet people, and I think living on campus is the best way to do that. Ideal if I didn't I'd be living at home and that would make it harder for me to make friends and such. If I would have chosen to live at home it would've meant either driving 30 minutes and competing for a parking spot or I'll have more resources available. I'm a freshman, and I thought it would be the best way to make friends, and develop relationships. I'm a Freshman. I'm a freshman. It makes sense.

I'm a student athlete. I'm an international student and living on campus was one of many options which I chose because my sister told me to. I'm an international student as you know, and I wanna save my time: I think if I were off campus, I would consume more of my time driving. I'm an only child, and I need to get away from my parents. I'm an out of state student.

I'm coming from a school with a graduating class of 600 and no one i know is going here. I'm excited to meet new people. I'm from Chicago, commuting wouldn't have been practical. I also really don't know the area so getting an apartment would've been a hassle. I'm from Illinois.

I'm from Iowa and it's cheaper than living anywhere else near campus. I'm from Milwaukee so it would be easiest just to live in the dorms. I'm from out of state and have no family in the area. I'm from out of state and it just made sense. It's also cheaper than renting an apartment. I'm from out of state so everything is new. Living on campus will help me get used to the city. I'm from out of state so I don't really have a choice! I'm from out of state so I thought it would be a good way to meet people.

I'm from out of state, and it was easier to request on campus housing than to search for an off campus apartment. I'm from out of state, I didn't really have a choice!! I'm from out of state, so I wanted to meet people and possibly get an apartment off campus my second year. I'm from out of town so it was what made sense to me.

I'm from Texas and don't know anyone, it would be lonely to live alone off campus. I'm from Wisconsin and living on campus would be easier than finding an apartment to commute from. I'm going to be 6 hours away from home and this would be the best transition for me. I'm not from the cities so it was the smartest option for me. I'm out of state and think it will add to my sense of community. I'm ready for new experiences, having independence from my family, and further shaping my own life. I'm unfamiliar with the Cities and thought it would be a good way to meet other people.
Important part of college experience;
close to classes;
no need to deal with commuting
In all honesty, I have no where else to stay. So living on Campus is the easiest thing to do.
In my opinion, it's the best way to start of a college career.
In order not to be as dependent on my parents and to live on my own.
In order to better and more easily meet people, be closer to my classes, and experience true college life.
in order to branch out more and meet new people.
In order to develop the feeling of a community.
In order to feel more connected to the school and students.
In order to make the transition to a new city easier.
In order to meet new people and feel more a part of my school/class
In order to meet other freshman (which is why I wanted to be in the all freshman dorms).

It is easier than driving back and forth
It is easier than getting an apartment
It is easier to attend classes while living on campus
It is easier to get involved and less hassle getting to classes.
It is easier to get to classes  and less distractions.
It is easier to live on campus to attend my classes and also for the experience of living in a residence hall.
it is easiest money-wise, and it seemed the best fit in order to properly get situated in the college life.
It is easiest to meet people.
It is easy and convienent
It is easy and convienent.
It is easy for me to make friends with a lot of people. I feel that I will belong to a community and the classrooms will also be close by. Also, I don't need to worry about my meals as they will be provided on campus.
it is important your first year
It is just easier to do.
it is less expensive and I live out of state
it is less expensive and it is a good way to meet people.
It is less stressful than having to commute to school and it's safer.
It is mandatory I live on campus.
It is more convenient
It is more economical and is recommended
It is most convenient.
It is much easier and more convenient than living off campus for me
It is much more easier to get to class and safer.
It is much simpler for a first year student to focus and not have to worry about housing constantly. It is my first year and I do not know anyone. It is my first year in the college. I am not familiar to the surrounding. It is my only choice, I'm from out-of-state. Also, it's part of the college experience. It is on campus, so it is closer to classes and school events that I plan to go to. It is on-campus and it is a great chance to meet more people and it is also good for me to improve my English. It is part of the college experience. It is part of the lifestyle and completes the experience. It is safe and convenient to live in a residence hall. It is safe and convenient to take the class and take part in the activities held in the university. It is safe and convenient. It is safe for international students and it can be a quick way to know the campus. It is safe, near to classes, And since I have Fulbright scholarship I have to live on campus in my first year. It is safer and more convenient for an international student like me to live on campus. And it is also the best way it is save it is semi far away from where i live It is the best way to connect with like-minded people and otherwise, also it makes me feel like a real part of the it is the best way to make friends. It is the best way to meet new people and adjust to college life in my opinion. It is the cheapest and most reasonable. It is the cheapest way for me. It is the cheapest way to live and my mom wished me to experience the dorms. It is the easiest for me since I live far away and I want to experience college life. It is the easiest way to meet people and to keep on task. It is the most convenient and part of the college experience. It is the most convenient option for me. It is the most convenient, and will immerse me more in college life than other options would. It is the most convenient. It is the most convenient and convenient It is time for me to develop character and live on my own. It is unforgettable. It is very convenient. It is very easy to get around and get involved if you're living on campus. It is way more fun. It just makes sense to live on campus, where everything is at my disposal. It just seemed like the right thing to do. It looks fun! It made the most sense and I wanted the dorm experience. It makes getting around a lot easier and I believe living on campus is a big part of college life. It makes it easier to get connected to the university and meet other people at the university. It makes more sense being from a different state and not having anywhere else to live. It makes more sense, wastes less gas, and makes me live in a residential situation away from home. It makes sense, live on my own, less expensive than apartment, be close to everything. It makes the college experience feel complete and it's much easier than commuting. It makes the transition into college easier. It saves gas getting to and from classes and home, it doesn't become a burden to my parents. It seemed a lot easier and more involved, especially for the first year. It seemed both convenient and helpful. Also, it sounds like a fun opportunity. It seemed like an important part of the college experience. It seemed like the best option. It seemed like the logical thing to do. I don't know anyone in Minnesota. It seemed like the right choice and it will help me meet new people. It seemed like what everyone else does their first year. It seemed smart. It seemed the easiest option. It seemed to be the easiest option.
It seems as though it will remove unnecessary strains on me being a freshman. It seems beneficial. It seems like a necessary experience for any college student. It seems like the easiest place to live to get used to college life and get to classes on time. It seems like the easiest way to get settled in a new area. It will also make it easy to find potential roommates to it seems more efficient and makes building relationships easier. It seems so much more convenient to be closer to all the other students and school resources. It seems to be much more convenient and provide the full college experience. It will be much easier to meet. It seems to work more cohesively with the entire college experience and everyone keeps telling me it's the best. It sounds more reasonable and convenient. I will also be closer to my peers. It was a more practical idea than getting an off-campus apartment. It was a secondary choice. Mainly because I didn't have the finance to get an apartment and because financial aid was advised, and I have heard that is where you really make the most and closest friends since everyone else is it was cheaper, placed me closer to the University, and provided a community. It was close to home and my high school where I very involved in. And the things here in Minnesota are it was easy. It was easier than finding an off campus apartment in an unfamiliar city. It was easier. It was either there or under a bridge. It was free. It was highly recommended by everyone. It was more convenient and I would have the ability to meet more people. It was most convenient. It was my only option. It was recommended. It was the best choice for me, and it is easier this way. It was the cheapest option; I had no where else to live. It was the easiest living space to acquire. It was the most convenient choice. It was the recommended decision. It was to far to commute from home and I wanted to get to know people. It wasn't near my parents and I didn't want to drive to class every day. It will allow me to get involved. It will be a fun and great experience to live on my own. It will be a good experience for my first year at the U of M. It will be a more traditional college experience. It will be easier for my to get involved on campus, and get to classes on time. It will be easier to get around. It will be easier to get to classes and get used to the campus. It will be easier to meet new people, get to classes, and experience the campus. It will be easier. It will be extremely fun and a great way to make new friends. Living on campus will make me a more independent. It will be less stressful this way. It will be more convenient. It will be the best for my academic and social growth. It will be the easiest to meet people. It will give me the opportunity to meet a lot of people that I would probably not get the chance to otherwise, and it will help me make new friends and have easier access to the resources offered on campus. It will help me transition from living and relying on my parents to focusing on living and taking care of myself. It will help to get involved. It will keep me more focused on my studies. It will make socializing and my freshman year a lot easier. It would add more to my college experience. It would be a good experience to live on my own away from my family.
It would be a great college experience
It would be easier than commuting.
it would be easier to adapt than living off campus
It would be easier to focus on school.
It would be easier to get involved.
It would be easier to get to my classes every day than driving and taking the bus from home.

It's much easier and much faster to attend the classes.
It's much easier to meet new people and typically what most freshman choose.
It's my easiest choice. It's my first year and I would like to get a feel for the college and get to know people! It's my freshman year. It's not at home and it's close to my classes. It's not only extremely convenient, but also helps to foster relationships with fellow students. It's out of the house and I can save money on gas and what not. The chance to make friends. It's part of the college experience. It's part of the college experience that I do not want to miss out on. It's part of the college experience, and because I'm from out of state there was no other option. It's part of the college experience, and convenient for classes. It's part of the college experience, and it helps with meeting new people. It's part of the college experience, why commute? It's part of the college experience. It's part of the experience. It's part of the university experience in my opinion. It's probably the best option to getting used to the campus and meeting people. It's really convenient and easier for my transition to college. It's really convenient to get to classes, and it will help me adjust to college life better in the beginning. It's required. And convenient. It's right in the middle of all the action. And it's easy to meet new people. It's safe and convenient. It's so much easier to already be living at school with no commute. It's something different, something I've never done before. It's the best decision for me. It's the best place to make friends and is convenient for my life in university. It's the best way to experience college. It's the best way to go for so many reasons your first year. It's the best way to meet people your first year and you're close to everything you need to be. It's the college experience. It's the college experience. You kind of have to be there to understand what it is all about. It's the easiest way to be in the mix of things. It's the most convenient and a good way to meet people. It's the most convenient. It's the most orthodox choice. It's the typical thing to do, I'll be close to campus, and it's a good way to get acquainted with the campus. It's too far of a commute from my current residence. It's very convenient and is going to be a great way to meet people and make friends. It's very safe. It's way to far a distance to even consider commuting. It's what all good freshmen do. It's what most freshman choose to do. It's what most freshmen do. It's what you do to get a college experience. I've heard that it is the best way for freshmen to get to know their classmates. I've never lived in a large city and thought it would be good to live in the dorms in order to meet people and feel I've never lived in the cities before and just figured it would be easier to get my bearings before I set off. I've never lived on my own before and I figured it would be much easier to live on campus than off. Just for the whole college experience and to become independent. Learn the layout of the U before I move off-campus. Learn to live on my own. Learning to take care of yourself and not relying on parents. Least expensive. Leaving home. Less expensive than an apartment.

Moving out of my house and becoming more independant
moving out of my parents house
My brother had a good experience in Middlebrook, which is where I am staying.
My Brothers did
My dad is kicking me out of the house because he says it will be a good experience to live with other people.
My family does not live particularly far away from the U, and I want to make my experience at the U as engaging and all-consuming as possible. While many of my high school classmates are going out of state, and naturally have a drastic separation from their previous home life, I hope to at least gain some of that degree of separation
My family home is in the Chicagoland area
My family lives in another state, so living on campus is the most practical.
My family lives too far away to commute. Plus Minneapolis is going to be a great city to experience.
